Education

Bachelor of Technology in Computer Science and Engineering

Shri Ramdeobaba College of Engineering and Management

CSE | CGPA: **9.35 / 10**

Nagpur MH

Graduating 2027

Coursework : Algorithms & Data Structures , Machine Learning , Natural Language Processing , DBMS and OOPs.

Skills

Programming Languages : Java , C , Python , JavaScript , TypeScript , EJS , HTML

Frameworks and Libraries : React Js , Next Js , Express Js , Node Js , Puppeteer , Hono Js , Clerk , Better Auth

Developer Tools : Github , Docker , Vercel , VS Code , Postman , Jira , AWS , Cursor

Design and UI Tools : Figma , Tailwind Css , Bootstrap , Shadcn UI , Spline

ORM and Databases : Mongoose , Prisma , Drizzle , MongoDB , PostgreSQL , MySQL , Appwrite , Convex

Experience

Acadme - Full Stack Developer Intern

Oct 2025 - Dec 2025

- Improved **RPA pipeline** with **Puppeteer** and **Redis** by optimizing navigation and extraction steps to reduce end to end runtime **~25 min** → **< 7 min**. Implemented **EXP** and **capped concurrency** with queue based execution control.
- Added **structured telemetry** (JSON logs) with failure analytics and integrated **NGINX** version **1.24+** reverse proxy routing with tuned timeouts or keep alive. Improving run stability to **> 95%** and cutting noisy runs by **~2 - 3x**.

Hacksagon ABV IIITM Gwalior - Project Lead

Feb 2025 - June 2025

- 36 hour hackathon** where me and my team developed a web application called **NeuroLearn** using **MERN** and **TS**. Containerized using **Docker** and deployed on **AWS (ECS Fargate + ALB + ECR)** with environment isolation. Reducing environment setup time and handling **~300+ concurrent requests** during testing.
- Integrated **OpenAI API** with secure secret injection (ENV or KMS style). Added **FIREBASE24** backed PDF Notes pipeline with versioned storage , shareable access tokens and atomic sync for team ready documentation.

Projects

SHADYX UI | Next Js , Typescript , Monaco , Convex

May 2025 - June 2025

- Built a frontend component library with **2000+** monthly users , featured on **sourceforge** and **SaasHub**. It has its own online compiler that supports Java , Python , Ruby , C++ , Go , Javascript , Typescript , C# , Swift and Rust.
- Supports **npm CLI** that is **@anuragcodes/shadyx** version **1.0.15** , with more than **80+** weekly downloads on an average. Reduced setup time by **60 - 70%** using the CLI based installation flow.

AXION | Next Js , Javascript , Open AI SDK , Appwrite , Hono Js

Currently Working

- Built a collaboration and delivery workspace with **CQRS** style orchestration , **SLA** driven scheduling , task management , issue tracking and **RBAC** enabled execution pipeline governance.
- Integrated **WebRTC** video conferencing for **P2P** in-app meetings and a shared **MDX** based reporting hub with **DaC** (Docs as Code) authoring , enabling **~3x faster** team collaboration and **~40 - 60%** reduction in sync latency.

Accomplishments

Leetcode - My Profile

- Solved **600+ problems** on Leetcode with over **2139 submissions** in the past one year , maintaining a maximum streak of more than **273 days**.
- Covered a comprehensive range of **DSA** topics , from arrays and strings to graphs and dynamic programming , with a strong focus on mastering easy and medium level challenges.

CodeChef - My Profile

- Consistently participating in Codechef contests with a highest rating of **1344** , earning the **1 star coder** rank by solving diverse algorithmic problems and improving competitive skills.
- Dedicated to maximizing problem solving on Codechef , tackling various challenges regularly to strengthen **algorithms** and **data structures** knowledge.
